PROFESSIONAL SUMMARY

Diligent Computer Science major with proficiency in Python, Java, and frontend development. Proven success in designing and implementing dynamic and scalable applications using contemporary front-end and back-end programming techniques. Dedicated to developing code that is both efficient and readable. Looking for an entry-level software engineering position to utilize classroom knowledge and professionalize technical abilities.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3, Matlab

Backend: RESTful APIs

Frontend: React.js, Tailwind CSS

Database: MySQL, MongoDB

Cloud & DevOps: Git, GitHub

PROFESSIONAL EXPERIENCE

Bio Signal Processing & Machine Learning Intern IEDC Cell Internship Completion Certificate

December 2025- January 2026

- Trained and evaluated machine learning classification models on EMG (Electromyography) signal datasets to identify patterns in muscle activity
- Implemented data visualization techniques to plot and interpret EMG signal outputs, aiding in model performance analysis
- Applied Python-based ML libraries to build, test, and optimize classification pipelines for biomedical signal data
- Gained practical exposure to real-world applications of machine learning in the biomedical and healthcare domain

Web Development Intern – MyJobGrow Internship Completion Certificate

- Developed responsive web pages improving user experience
- Collaborated with team on real-world projects
- Optimized website performance and debugging

PROJECTS

AgroMind — Precision Agriculture AI Platform | Python · PyTorch · React · FastAPI

- Built IoT-ML platform with 7 AI modules for smart agriculture
- Developed AI models for irrigation, disease detection & crop prediction
- Achieved high accuracy (91–94%) and improved water efficiency (~35%)
- Created multilingual React dashboard with real-time insights

November 2025 - February 2026

ReliefChain — Decentralized Disaster Relief Governance | Next.js · Solidity · Polygon L2 · IPFS · Claude API

- Built ReliefChain (Next.js, Solidity, Polygon, IPFS) for transparent disaster fund distribution with milestone-based smart contracts, reducing admin overhead by 40–60%.
- Added AI fraud detection (Claude API) + geo-verification with a Sybil-resistant DAO voting system.
- Enabled WhatsApp verification, UPI-to-USDC payments, and IPFS audit trail with zero crypto knowledge via account abstraction.

CERTIFICATIONS & ACHIEVEMENTS

- Cyber Security Fundamentals (Credential ID ANKT09PNKTTR)
- Advanced System Security Topics(Credential ID PRO5Y6MT8HR1)
- Introduction to Programming with MATLAB (Credential ID GOT021DPSYGE)
- Artificial Intelligence Fundamentals (IBM)
- Genspark 2.0 Finalist
- Genovate 2025 1st Runner up
- Srijan'26 Finalist

EDUCATION

B.Tech in Computer Science(Internet Of Things)

2024 - 2028

University Of Engineering And Management,Kolkata | CGPA: 7.8/10(1st year)

Higher Secondary (Class XII), Karnataka State Board

Matricular(Class X),West Bengal Board (Percentage : 83.14%)
